**DIFFERENTIAL EQUATIONS.
PROBLEMS AND SOLUTIONS**

**Editura ALMA MATER
BACĂU, 2015**

Contents

Introduction	vi
1 First-order differential equations	1
1.1 Theoretical considerations	1
1.2 Differential equations of the form $y' = f(x)$	2
1.3 Exact differential equations	7
1.4 Integrating factor technique	16
1.5 Separable differential equations	28
1.6 Homogeneous differential equations	47
1.7 Equations reducible to homogeneous form	56
1.8 First order linear differential equations	64
1.9 Bernoulli differential equations	86
1.10 Riccati differential equations	93
1.11 Lagrange differential equations	102
1.12 Clairaut differential equations	108
2 Higher order differential equations	115
2.1 Higher order equations integrable by quadratures	115
2.1.1 Equations of the form $y^{(n)} = f(x)$	116
2.1.2 Equations of the form $F(x, y^{(n)}) = 0$	119
2.1.3 Equations of the form $F(y^{(n-1)}, y^{(n)}) = 0$	122

2.1.4	Equations of the form $F(y^{(n-2)}, y^{(n)}) = 0$	125
2.2	Equations that admit the reduction of degree	130
2.2.1	Equations of the form $F(x, y^{(k)}, y^{(k+1)}, \dots, y^{(n)}) = 0$	130
2.2.2	Equations of the form $F(y, y', y'', \dots, y^{(n)}) = 0$.	133
2.2.3	Homogenous equations of the form $F(x, y, y', \dots, y^{(n)}) = 0$	139
2.2.4	Homogenous equations of the form $F(x, y, \frac{dy}{dx}, \dots, \frac{d^n y}{dx^n}) = 0$	143
2.3	Higher order linear differential equations	144
2.3.1	Higher order linear differential equations with variable coefficients	144
2.3.2	Higher order linear differential equations with constant coefficients	163
2.3.3	Euler equations	195
3	Systems of differential equations	197
3.1	General considerations	197
3.2	Systems of equations with variable coefficients	208
3.3	Systems of equations with constant coefficients	211
